

quent in temperate areas of the world?

2. Is there a relationship between the incidence of human and animal actinomycosis?

3. Is the occurrence of actinomycosis in temperate zones related to any racial factor?

Dr. Robert Gumbiner, 429 Winslow Avenue, Long Beach 14, California, is seeking to foster international contact among doctors and writes: "Through our medical group of eight physicians, we are developing a new plan which might be called 'Doctor-to-Doctor'. We wish to contact another group of doctors in one of the Latin American or other countries with the objective of setting up an exchange program.

"This program might consist of exchanging a doctor and his family from one group to another including exchanging houses, cars and professional facilities for a brief period of time, i.e. one month. In this manner, we hope that doctors of similar orientation might be able to change into another cultural situation in which they would be part of the working picture rather than on the outside looking in." Dr. Gumbiner would like to get in touch with anyone interested in his project.

Dr. Eleanor Barrett (Los Angeles County General Hospital, Psychiatric Hospital, 1934 Hospital Place, Los Angeles 33, California) would like to meet European colleagues specializing in psychiatry.

She writes: "I noted that you are interested in fostering the exchange of medical knowledge between the USA and other countries. I, too, am interested in this and specifically would like to compare psychiatric approaches to patients. If possible, I should like to do this as part of my residency program in a country speaking German or English.

"I will have completed my second year of psychiatric residency in June, 1964, and would be available thereafter. Can you help me contact a hospital or clinic with an exchange or fellowship program abroad?"

We are certain that, among our readers, there are physicians who would like to assist Dr. Barrett.

We regret that, because of a typographical error, a four-hourly dosage of 50 mg of erythromycin was advised in the last paragraph of Dr. Evan Thomas's article on syphilis in the 2nd issue of ABBOTTEMPO. This should, of course, have been 500 mg.

75 EXCITING YEARS

THE LONG WHITE LINE, THE STORY OF ABBOTT LABORATORIES

by Herman Kogan (Random House),
an informal narrative of Abbott's exciting and sometimes
controversial role in seventy-five years of medical history.

On sale at bookstores at \$5.95. Available at \$2.00 to physicians,
pharmacists, medical and pharmacy students only. Send check for
\$2.00 to Dept. 345, Abbott Laboratories, North Chicago, Illinois.

INDEX TO AUTHORS

With this edition, ABBOTTEMPO has been in existence for a year. Here, for readers' reference, is an index to authors who have contributed to the first four editions. Roman numerals indicate the edition, Arabic numerals the opening page of the article.

ANSART, Prof. Manuel Bastos:
Surgery on the aged, III, 2.
ANTOINE, Prof. Bernard:
Potassium deficiency of kidney, I, 30.

BOUDREAU, A., MD:
Alcoholism, IV, 24.
BRACKENRIDGE, C. J., MD:
Electrophoretic analysis of serum proteins, IV, 21.
BROWN, J. H. U., Ph.D:
Engineering in the health sciences, IV, 28.
BRUUN, Prof. Egon:
Allergy (symposium), IV, 4.

CARSTAIRS, Prof. G. M.:
Art and psychotic illness, III, 15.
CHRETIEN, Prof. J.:
Needle biopsy of the pleura, III, 25.
CLOETENS, Prof. W.:
Myocardial infarction (symposium), I, 20.
COGNAT, Raymond:
Art and longevity, I, 9.
CRAHAY, Prof. Roland:
Psychology of fasting, I, 35.
CURETON, Prof. Thomas K.:
Medical aspects of tennis for the middle-aged, I, 27.

DELAURETAS, Prof. J.:
Syphilis (symposium), II, 6.
DUBOURG, Alain-Yves, MD:
A fabulous physician (Dr Jean Francois Coste), III, 28.
DURAN, Prof. Carlos Martinez:
Surgery of the Mayas, IV, 14.

ERIKSSON-LIHR, Dr Zaida:
Allergy (symposium), IV, 13.

FITCH, Prof. Franklin R.:
Syphilis (symposium), II, 9.
FEINBERG, Samuel M., MD:
Allergy (symposium), IV, 2.

FRANKLAND, A. W., MD:
Allergy (symposium), IV, 5.
FREYBERGER, Prof. Hellmuth:
Endocrinology and nutrition (symposium), III, 13.

GAUSSEN, Dr L.:
Gastric research (photographic techniques), I, 3.
GUENIOT, Prof. M.:
Medical tourist's guide, I, 23.

HALPERN, Prof. B.:
Allergy (symposium), IV, 8.
HARTERT, Prof. Hellmut:
Myocardial infarction (symposium), I, 17.
HOARD, Gordon:
Post-graduate training in Chicago, I, 6.
HIGDON, Hal:
Touring medical America, II, 33.

IZBICKI, John:
Medicine comes to Yemen, III, 32.

KOLFF, W. J., MD:
Artificial organs, II, 16.

MALOOF, Prof. Fahare:
Endocrinology and nutrition (symposium), III, 6.

MEERLOO, Prof. Joost A. M.:
Nuclear death wish, II, 28.

RUSK, Howard A., MD:
Rehabilitation of the handicapped, III, 22.

SCOTT, J. A., MD:
Atmospheric pollution, IV, 30.
SOUBIRAN, André:
Medical services under the Pharaohs, II, 19.
STARR, Prof. Paul:
Endocrinology and nutrition (symposium), III, 11.

THOMAS, Evan W., MD:
Syphilis (symposium), II, 4.
THOYER-ROZAT, Prof. J.:
Celioscopy and sterility, II, 24.

VERDUN di Cantogno, Prof. Lorenzo:
Myocardial infarction (symposium), I, 14.

WILLCOX, R., MD:
Syphilis (symposium), II, 2.
WINTER, Dr Eric de:
Kuatsu—the Asiatic tradition, II, 12.
